SCHOOL FOR SPECIAL NEEDS

**HOPE School
for
Special Needs**

HOPE School For Special Needs is a private school that follows an American Curriculum: the **High/Scope** educational active learning approach. The School is made up of 42 classrooms plus additional rooms for specialists, a swimming pool, gyms, cafeterias and an expansive playground.

Children are assigned to classrooms based on their age and developmental level. Pre-school and KG classrooms are separated into specific learning areas: toy area, computer area, art, music, writing area and reading areas.

The elementary classrooms focus on academics with additional areas for Science, Math, and Language. Each area of the classroom is equipped with a variety of educational materials and manipulatives that encourage learning.

The school uses a comprehensive assessment tool, COR (Child Observation Record), which is an ongoing evaluation of each child's progress. It is designed to focus on the broad cognitive, social, emotional, and physical development.

The school offers breakfast and lunch for its students. All meals are gluten free/casein free (GF/CF). Bus transportation is also provided by the school.
